

PNEUMATIC ACTUATORS

PROPORTIONAL OR 2 POSITION

KREUTER

MCP-3631

The 331-4826 Pneumatic Damper Actuator is a compact, modular, totally enclosed, rolling diaphragm-type actuator designed for modulating or two position actuation. Typical applications are for control and fire/smoke leakage rated dampers or air valves.

- Fixed or pivot mounting models.
- Position relay available as an option.
- Variety of mounting/linkage kits to fit any application.
- Threaded shaft for easy mounting of accessory items.
